

ANNUAL REPORT INFORMATION

TYPES OF LOCAL GOVERNMENT SOLID WASTE PROGRAMS

Requirements and Instructions: In 2002-2003 as Ecology and local governments collaborated on the Beyond Waste planning process and CPG's JLARC implementation process, we discussed the need to have information on the scope of local solid waste programs. This information will:

- Allow local governments to identify pioneering programs and learn from their efforts,
- Help identify gaps between existing programs and statewide priorities,
- Help inform CPG investment priorities,
- Suggest correlations between programs and environmental results, and
- Form a structure for organizing performance and effectiveness data.

Please check all appropriate sections for your jurisdiction. This information should be submitted to your Ecology grant officer by January 30 of the following calendar year. **Use F11 key to navigate through text boxes**
